

VALMECA has been active for more than 50 years in several industrial sectors, including the steel industry, metallurgy and, more recently, dam and hydropower projects, nuclear energy and the defense sector. The company is strongly committed to a policy of continuous quality improvement. Our approach is firmly customer-focused and aims to meet our customers' requirements while carefully addressing their needs.

Our quality policy primarily focuses on the systematic management of risks and opportunities associated with our design and precision machining activities. It involves the commitment of senior management as well as all employees and is based on four key priorities:

- Providing a high-performance technical infrastructure to ensure our customers benefit from state-of-the-art technologies and the highest quality standards.
- Developing the skills and expertise of our teams while fostering a motivating and supportive working environment.
- Ensuring full compliance of our production activities with all applicable requirements, including legal and regulatory obligations.
- Continuously improving our quality management system.

The implementation of these priorities strengthens the commitment of our employees and reinforces our position as a trusted partner in our industries, with the customer at the center of everything we do.

To achieve this objective, every member of the company is encouraged to embrace these values and actively contribute to our quality approach, which is based on the principle of continuous improvement. In addition, the company is committed to providing all necessary resources to implement this policy, achieve the defined objectives and regularly review them, ensuring the ongoing improvement of our quality management system.
